

Avide LED White Filament Globe 4.5W E27 WW 2700K-4er

Product code: AWLFG27WW-4.5W-4ER
Brand link:
ID: AB-190518
Company name: Bramcke Hungary Kft.
Company address: Kishatár utca 17., 4031 Debrecen

QR code:

Date of issue: 2025-05-14

Page: 1/3

SPECIFICATIONS

EAN code: 5999097964546
Warranty: 3year(s)
Socket: E27
Working temperature:
Packaging: 4/b 2000/p
Certifications:

TECHNICAL DETAILS

Wattage: 4.5W
Voltage: AC220-240VV
Beam angle: 360°
Dimmability:
Lumen output: 470lm
Color temperature: 2 700K
Lifetime: 15 000h
Energy class: F
CRI: 80
IP standard:

BOX PICTURE

PRODUCT SIZE

Diameter: 60mm
Height: 150mm

CARDBOARD BOX

EAN: 5999097964546
Packaging: 4/b 2000/p
Dimensions:
Net weight: 30g
Gross weight: 48.5g

CARTON

EAN:
Packaging: 4/b 2000/p
Dimensions:
Net weight: 0.03kg
Gross weight: 0.0485kg

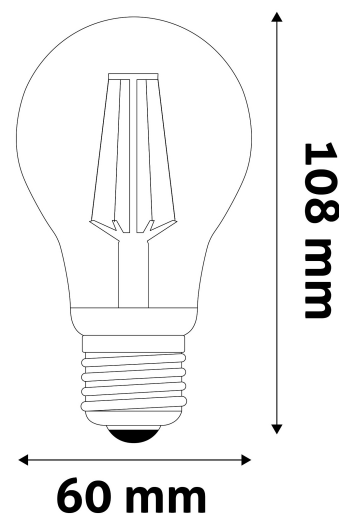

PALLET EXAMPLE

Height:
Width: 120cm (std Euro pallet)
Mepth: 80cm (std Euro pallet)
Cartons per pallet: 2000carton/pallet
Cartons per row:
Net weight: 60kg
Gross weight: 97kg

PRODUCT DESCRIPTION

The LED filament products are professionally-designed light sources that can be used to effectively replace traditional light bulbs in most lighting environments.

This vertical line arrangement not only provides high brightness but can also produce a 360 ° projection angle. The advantages of LED lights are clearly visible here, their heat dissipation is low, thus they do not produce unnecessary heat energy, they emit light with maximum efficiency and thus can also be used at places where heating might represent a hazard.

Placement within the lamp shade or higher is the adequate choice for a transparent product. In the case of a transparent product, avoid direct lighting and at such places use types with an opaline shade instead, which provides a pleasant homogeneous light and does not dazzle the eyes.

As opposed to traditional LED technology, in the case of filament products the chips are placed on transparent columns separated from each other and are then covered with phosphorus. This is called COG or Chip on Glass technology. This procedure enables the replacement of traditional light bulbs both aesthetically and in terms of size. They do not flash, sparing they eyes this way. Switching them on and off does not shorten their service life. As they do not contain a filament per se, vibration or shock does not necessarily result in the failure of the light source.

LED lights do not emit light by heating up a metal filament but by means of electrons, thus they have a minimal heat loss. You can save up to 80% energy compared to traditional light bulbs when using LED technology. LED lights produce minimal heat, thus they can also be used at places where heating might represent a hazard.
